¹ Intent is to remove or reduce cost barriers on any type or combination of independent consulting services required for the energy management project up to a maximum grant of \$17.5 K. That is, the consultant must be independent from any project contractor, services can be for any combination of services including a paid energy audit as noted above, post audit services including advise on project design, tendering including development and issuance of Request for Quotes, conduct bidders' meetings, contractor selection and or project management services.

² Refine cost estimates, selection of trade contractors and relevant materials and systems

³ Construction and Project Management

⁴ Measurement & Verification to ensure expected benefits are received and maximized
